Two-buttons game: helicopter moves up-left or up-right and you must release them for going down. Rescue the little people before the other chop does.

Main game mode goes split screen even if you play alone, as you must compete with a bot. Theoretically you can play against other players on the Internet, but look at today players or maximum players: they are few.

There's an infinite mode with achievements.

The only music track it has is ok.

Two hours. Nice for the price.. Well, that was a waste of money. This game will not display properly on a 1920x1200 (24inch) monitor. You have the option to play in window mode, but you won't be able to read anything unless you're 6 inches from the screen. sigh.

Also attempted to steam stream this to my MAC, it also does not display properly. What a waste.

Don't buy, unless your machine is a 486 MX with 2MB graphics card. I think that's the MAX this game will allow.. Nailed it with the first word.. Who seeks my aid today? Send them forth!

A visiting orc?

Goblin musician?

Weary farmer?

Traveling jester?

... I see.

TO THE DUNGEON!. awefull, waste of money. 2D Virtual On. What more do you need to know?

Game of the Year Awards (1962-present): <http://culture.vg/reviews/awards/game-of-the-year.html>
[Videogame Culture: http://culture.vg/features/art-theory.html](http://culture.vg/features/art-theory.html). The game is exactly as weird as the screenshots imply: an undeniably strange experience, seemingly existing for comedic and satirical purposes more than anything else. If you're not expecting much of a story then this is an amusing, short experience. A unique and occasionally funny experience, which I'm only recommending on that basis.. A no-nonsense challenge mode to a game with unique and fun combat mechanics. You get some pretty cool loot for beating these challenges in-game. I think there are about 10-12 bundles of 3 challenges with specific gimmicks.. Very good game, worth the money, only complaint I wish it ran a little longer. However I still recommend this game.. Really really, good story driven text adventure/graphic interface/interactive media/whatever you want to call it! I fell in love with this game and cannot get enough. It really sets a mood. You will get fully immersed in the story before you realize it. Could not recommend more.

really ♥♥♥♥ing easy. Having a lot of fun with this Tower defense once I got my brain into gear.

There a a number of buildings to get your head around in the early stages, but once you do, it is a great game.

There is a bit of grinding, but I am enjoying this aspect more than most tower defense games as each level releases differnt buffs on every run through,

Additionally, a real feeling of anticipation when you hit new levels to see what new enemies show up.. First of all, if you're a fan of the Infinity series, you'll definitely be interested in this game. But even if you're not, if you're a fan of games with a lot of story and sci-fi, you'll enjoy it.

Personally I found the story kind of dragged a lot of the time, but it was still good. A lot of the plot points are infuriatingly obvious, but you have to bear in mind that the characters don't see everything that you do.

The Xtend episode felt like a complete waste of time to me, it was 90% repeated content that isn't flagged as read so you can't skip it without changing the settings. The rest of it was really centred around romantic subplots, which I can understand people enjoying but personally I wasn't interested.. One of my favorite strategy games ever and my personal favorite time\setting for the Anno series got a wonderful expansion pack.

Wonderful graphics for its time, fun gameplay and a wonderful expansion pack are just some of the joys that Dawn of Discovery and its expansion pack Venice offer.

If you want an older strategy game that you can sink many hours into pick this up, while I don't find it has quite the depth that 2070 had, I do like the setting and time more personally.

If you are going to check out the upcoming Anno game I suggest you check out this one and 2070 to get ready for another entry to this wonderful and in depth series.. The visuals are nice.

Boss fights are fun but could use some work. They are fun at the start, but some of them get boring when you get their hp bar to half, because instead of getting harder and more exciting, they actually get easier...

Also, some boss fights are the same from the beginning to the end. It's not that they aren't fun, but being a platformer twin stick and all, you kinda expect scenario changes\harder patterns when you get them to half of their hp.

The statues and shield bonuses are nice, they add a castlevania feel with the secret places and all, but I just wish we had more hidden secrets and better hidden areas.

The soundtrack is amazing.

I wish we had more powers too. Most of the guns are okay, a few are extremely powerful and just removes any kind of challenge the game might give it to you.

We could use more enemies. Many of them are reused in every stage, with a few unique enemies per stage.

We could use a time attack mode and a scoreboard.

Zane is not well balanced. The stage is a piece of cake for him as he pretty much one hits everything. Some boss fights can be nearly impossible to him, though. But it adds a challenge, so that's actually cool. Boss fights get exciting again, all of a sudden.

With all this said, it is a decent game. It's actually a great game, being "Viktor 1". I recommend it, and I hope they make a second one with more content and better boss fights.. Absolutely amazing game, would recommend it to every one of my friends.

. Irony Curtain Premiere TODAY with 10% OFF!:

Comrades!

We're at the finishing line of accomplishing a dream we've had for a very long time – publishing our own point and click adventure. Irony Curtain: From Matryoshka with Love is now live!

https://store.steampowered.com/app/866190/Irony_Curtain_From_Matryoshka_with_Love/

Throughout the years of avid gaming, sleepless nights filled with solving puzzles and laughing at all the jokes **we kept dreaming of bringing something to the table, enriching the genre somehow** – and now we put Irony Curtain in front of you to gauge how we did. We tried to give you **a classical point and click** with all the things we loved about the old-school games such as the Monkey Island series, but also do something based on the experiences that shaped us – such as the reign of communism in Poland, which affected most of us in one way or another.

<https://youtu.be/UIMTOysqbOg>

We joked about Irony Curtain being **Deponia meets Papers, please** – and we hope it's true! It's a classic point and click adventure, with a story that will keep you hooked, with fleshed out, relatable characters, full of humour and well-placed easter-eggs, riddles that will keep you puzzled, with a familiar interface, known from other p'n'c titles – all that without the elements that made us grit our teeth in the classics – the riddles can be solved by rational thinking (no dream logic!), some of them even have more than one ways they can be solved, it has good **music – created by Peter McConnell and Arkadiusz Reikowski** – and will keep you entertained for up to 10 hours!

So, **we're calling on all point-and-click fans** – we know you're out there! Play Irony Curtain, tell us how we did! We hope that we managed to bring you a wave of nostalgia, laughter and some insight into the absurdities of communism.

If you'd like to reach us, please don't hesitate to check out [the Steam Forums](#). See you there!
